Coding & Solution

Date	3 October 2026
Team ID	SWTID-2026-9282
Project Name	ComicCraft-AI Comic Creator using Gemini Models
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented **ComicCraft – AI Comic Story Creator using Gemini Models** application. The solution provides AI-based comic story generation, five-panel comic creation, AI image generation, comic preview and PDF export functionality using a FastAPI-based web application.

Instructions

1. The ComicCraft code is organized into separate modules for backend routes, Gemini AI integration, image generation, layout building and PDF export.
2. The solution addresses the core problem of automatically creating comic stories and illustrations from user-provided inputs.
3. The project includes source files, templates, static files, configuration files, dependency files and setup instructions.
4. The project source code is maintained in a GitHub repository.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/vasilabanuvasilabanu/ComicCraft-AI-Comic-Story-Creator
Programming Language(s)	Python, HTML, CSS
Framework(s) Used	FastAPI, Uvicorn, Jinja2
AI Technologies Used	Google Gemini API, Hugging Face Inference API
Key Features Implemented	AI story generation, five-panel comic generation, AI image generation, comic preview, PDF export and download, FastAPI API documentation
Pending / Incomplete Features	None
Setup / Run Instructions	Configure API keys in `.env`, install required dependencies, open the project in VS Code and run the FastAPI application using Uvicorn.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	yes
2	Meaningful variable and function names are used	yes
3	Code includes comments / documentation where necessary	yes
4	Error handling is implemented for critical operations	yes
5	The application runs without critical errors	yes
6	Code is committed to a version control repository	yes

Additional Notes / Comments:

ComicCraft successfully implements the core requirements of the project. The application accepts user inputs, generates a comic story using Gemini AI, creates AI-generated comic panel images, displays the completed comic and provides PDF export functionality. The source code is maintained in GitHub and the application can be executed locally using FastAPI and Uvicorn.
